

Patients and Caregiver

Long-Term Care Home List

This document is for patients who are considering placement in long-term care homes (LTCHs) and their caregivers. This information is provided to help with your decision-making and provide basic information about what different LTCHs have to offer their residents.

We strongly encourage patients and caregivers to research and visit each home the patient is considering living in. It is important to gather any and all information that would help your family make sound decisions on which homes would be suitable for your loved one.

Short-Stay Interim (SSI) Program for Patients in Hospital

This program offers eligible patients an alternative to staying in the hospital while they wait to be admitted to their permanent LTCH. Specifically, it is for patients who occupy a hospital bed but no longer require acute hospital care. They need another level of care, are eligible and on a waiting list for a long-stay admission to a LTCH. If eligible, the choices made from the list below are in addition to your permanent LTCH choices, and you must always keep at least one permanent LTCH choice open while in an SSI bed. The SSI beds are temporary; there is no option to remain in them permanently.
