Ontario Health atHome

Specialized Wound, Ostomy and Continence Care

North East area

Ontario Health atHome offers evidence-based, best practice wound care in alignment with Ontario Health (formerly Health Quality Ontario) wound care standards and Wounds Canada. Specialized wound care teams that may include Nurse Champions, Nurses Specialized in Wound, Ostomy and Continence, and dedicated wound care coordinators are available to support patients with acute, chronic and complex wounds.

How we can help

Specialized nurses collaborate and establish treatment plans with community service organizations, primary care doctors, nurse practitioners and hospitals to provide coordinated wound treatment and ostomy-related plans to meet a patient's specific needs.

We provide comprehensive wound care management using gold standard treatment options.

What you can expect

Based on an assessment, your care coordinator may include wound, ostomy or continence care services in your care plan, including:

- A comprehensive nursing assessment and a customized treatment plan
- Guidance and education about care and products, and self-management techniques
- Recommendations for services that may assist with your healing (e.g. registered dietician, occupational therapy or physiotherapy)

Am I eligible?

You must be a resident of Ontario with a valid Ontario Health Card and be assessed by your care coordinator as having care needs related to this service.
